12:00 PM – 1:00 PM	Lunch
1:00 PM – 4:30 PM	Tips and Tricks Session

PROGRAM:

Esri “Sharpen Your Skills” Seminar

Esri’s software has evolved into a powerful platform for accomplishing every organizational task no matter the scale. During the “*Sharpen Your GIS Skills*” seminar in the morning session, Esri’s staff will present and demonstrate proven best practices and intelligent workflows to simplify and modernize the way you do your work.

Attend this seminar to:

- Learn about the wealth of data, templates, and other resources available for your projects
- See examples of how and when to use basic to complex analysis tools to drive better decision making
- Get ideas for extracting more value and better information from your existing software and data
- Expand your knowledge of the latest GIS tools and how you can take advantage of them

Don’t let your skills grow dull!!

Presenters/Instructors: J.D. Overton, Esri Solution Engineer and David Smith, Esri Account Manager will be presenting this content.

Tips and Tricks Session

Broaden your GIS skills and learn about new tools and workflows to incorporate into your own GIS practice in this “Tips and Tricks Session” centered around five unique presentations:

- **“Building a story map to explore the Indiana Limestone Photograph Collection”**
Becky Meyer, GIS/Database Analyst, Indiana Geological Survey
- **“Prepping your data for the field and out-of-the-box mobile GIS applications”**
Andrew McKinney, Mobile GIS Lead, Kentucky Transportation Cabinet
- **“EzDialog: An Easy Way to Create GUI Interfaces to Standalone Python Scripts”**
Mike Callahan, Hydrologist, National Weather Service Louisville
- **“Working with Parcel Fabrics in ArcGIS”**
Tom Moreland, GIS Coordinator, Madison County Information Technology
- **“Geospatial Analysis and Property Valuation”**
Jay Mickle, Director of GIS, Jefferson County PVA

Moderator: Matt Wagoner, GIS Manager and Principal, Stantec
